

Since arriving in Port Ludlow more than ten years ago, I have served on the LMC Greenbelt Committee, LMC Board of Trustees, Port Ludlow Village Council Board and PLVC Utilities Committee among others. Most recently I co-chaired the committee to raise funds to update the Beach Club kitchen. Having a wide range of experience in Port Ludlow and the North Bay allows me to understand how the Drainage District fits into the larger community. I have a variety of work experience both in government and as president of a construction company. I understand the regulatory processes and the constraints placed on the Drainage District as a part of government.

I was appointed to the Drainage District to complete the term of a previous commissioner. During my time on the PLDD we have undertaken the last major project of the District's long-range plan and we have reduced the budget by approximately 10 % for 2014. We have changed accountants at a savings to the district and updated the district web site. The District is in transition from large construction projects for storm water control to planned maintenance of District facilities and service to its members and I am pleased to be a part of this change.

I believe I can continue to contribute to the Drainage District's services to the North Bay. I can offer our community open, efficient operation of the District. I would appreciate your vote.
